Background

- Wote is a project idea by Martin Blom.
- First version of Wote was made for Windows.
- The Windows version can 'hook' and 'steal' characters.
- The window can also be made transparent.
- These are the two most important functions of Wote.

ile Format		
On top Hook Steal 100%	Find what:	Found:
This is a nightmare		A 7 COLO MARINE
nd you better wake up.		
3, Col 24, Words 9, Chars 34		
5, C0124, Words 5, Chars 54		

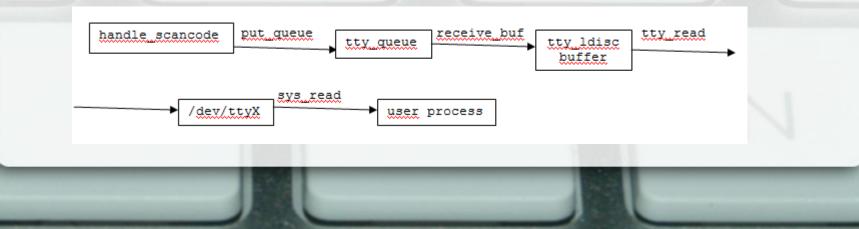

Background

- If the window is transparent, we can type our text while reading another document.
- Since Wote can be set on top of other applications, we can see Wote while browsing through the document with focus.
- If we 'hook' or 'steal', we can also type our text in Wote while browsing the other document.

On top Hook Steal 50%	Find what:
: Weirdest Dreams	Find with Found:
This is a nightinge might I had a dream where I was at a place and we w in and youbëtter wake int o a house nearby. In that house I thing was black and white. Reminds me of Pokemon B secret group of people, and everything seemed b/w res on the walls, but I tried not to look at them, beca I walked back up, my cat was human for some reasc	was looking out a window and it was very dark out lack by the way. I also dreamt of going down wood again (rather contrasted, because there was little g use I did not want to be taken for a spy. I told ther
dreamt I was going to sleep in the barrack wherein t to sleep with me in the narrow bunk, because there	
ay with our legs over the edge of the bunk (just like t
